Google Cloud Summer 2021 Program

Description of the program

The Google Cloud Platform (GCP) is a public cloud service platform that enables organizations to organize, store and analyze data and develop business-friendly IT solutions and applications.

Storing data and business applications in the cloud, brings flexibility, scalability and cost-effectiveness to organizations. During this program the participants have dived into the world of Google Cloud and worked with their team to solve how to build, manage, maintain and develop solutions based on Google Cloud platform. The participants have the skills to leverage Google Cloud Platform environment to build, migrate, maintain and design robust and optimal solutions.

Program Content

Google Cloud	Serverless Solutions
Associate Cloud Engineer certification	Python & Git
Cloud Operations	Compute & Containers
Cloud Architecture	Kubernetes
Event-driven Architecture	Monitoring & Troubleshooting
Networking & Content Delivery	DevOps
Security, Identity & Compliance	CI/CD pipelines
IaC – Terraform	API Development
Databases & Storage services	Linux fundamentals
Data Engineering	Command line tools
Data ETL process	Agile software development

AW Academy

At AW Academy, we believe that learning is a process that occurs when the individual interacts with others, to embrace and implement knowledge, skills, and competence. Consequently, we place great emphasis on identifying and developing the individual's capacity for learning. Besides learning new subjects' areas, individual's
