Reskill Training for Software & Technical Engineers

Description of the program

Java is one of the world's most widely used programming languages, hence it has been used as the primary language for the exercises in the Reskill training program. Java is an object-oriented, independent platform and has great performance, which means that the language has a wide range of applications and many companies use it to develop software systems, build platforms and apps.

Program Content

Programming Fundamentals	Java
Problem Solving	JavaScript
Responsive Web Design	HTML and CSS
Version control using GIT	React
Functional Programming	Introduction to C#
Object Oriented Programming (OOP)	SQL Databases
Test Driven Development (TDD)	DevOps with CI/CD
Agile Methodologies	Cloud Computing with Azure

AW Academy

At AW Academy, we believe that learning is a process that occurs when the individual interacts with others, to embrace and implement knowledge, skills, and competence. Consequently, we place great emphasis on identifying and developing the individual's capacity for learning. Besides learning new subjects' areas, individual's at AW Academy, get to practice our pedagogical methods which lays a great foundation for their skill in learn-to-learn.
